YOGA CAMP - WEEK 1

Summer and Yoga—a great combination! Our Kids Yoga Camp is designed to provide kids with a fun, creative, educational and enriching experience. Through a combination of yoga poses and games, group activities, themed craft projects, relaxation time, and more, kids will be able to strengthen their bodies, minds, and spirits. We offer a non-competitive, nurturing and supportive environment where kids can learn to learn to work cooperatively as well as learn to care for and nurture themselves. A week- long camp is sure to create lasting memories, new friendships, and a foundation for health and well-being!

CRITICAL THINKING CAMP - WEEK 2 and WEEK 6

Solid mathematic skill is crucial for future success but not enough to be competitive. Children need to learn how to think and apply knowledge to solve complex problems. In this camp, we use the cutting edge tablet based learning system, RISU that allows optimization for the each individual for the best outcome. RISU provides both critical thinking and math questions best fit to each individual. We also learn about one of the most important issue, "Energy" for its nature, storage, conversion, production and experiment them. After this camp, children will overcome weakness in math, strengthen critical thinking ability and understand energy from scientific viewpoint.

PROGRAMMING WITH ROBOTS & CRITICAL THINKING- WEEK 3

This one-week coding program is fun and designed for beginner programmers that does not require any previous programming experience. However, any previous programming experience is beneficial. Your child will learn the fundamentals of coding such as step by step movement, loops and branches. Also, your child will learn about the fundamentals of robotics, the real-time feedback mechanism and defining actions based on the real-time sensor data. This program uses Sphero as the robots. Your child will solve challenges by controlling a robot with programs or analyzing the feedbacks. For the programming, we use the visual programming tool optimized for the robot. The rental cost of robots and tablets are included in the class fee. Your child will also enjoy a lot of critical thinking quizzes that trains your child to think more flexibly and logically. Gifted and talented students will learn skills that schools do not teach but are required for SAT and competitive math tests through quizzes.

CHESS AND BOARD GAME CAMP - WEEK 5

Bay area chess provides professional chess instruction tailored to each student's skill level. Students will learn the rules of the game, tactics, checkmates and positional play. Board games can be an instrumental tool to grow and encourage skills in social engagement, logical reasoning, math, visualization critical thinking, team work and cooperation. Throughout the days, kids will have an opportunity to learn games from multiple genres with the help of BayareaGurukul staff and volunteers. The games selected for the camp will give students a comprehensive understanding of the skills and fun to be gained through collaboration and friendly competition.

RECYCLE ART CAMP - WEEK 6

Kids will use materials that we use every day, every moment, without realizing how with our imagination, we can use that material to create an amazing art project. We will use water bottles, used cardboard and plastic (plates, forks, etc.), and much more! The only thing kids have to bring is imagination.

CRITICAL THINKING CAMP - WEEK 2 and WEEK 6

Solid mathematic skill is crucial for future success but not enough to be competitive. Children need to learn how to think and apply knowledge to solve complex problems. In this camp, we use the cutting edge tablet based learning system, RISU that allows optimization for the each individual for the best outcome. RISU provides both critical thinking and math questions best fit to each individual. We also learn about one of the most important issue, "Energy" for its nature, storage, conversion, production and experiment them. After this camp, children will overcome weakness in math, strengthen critical thinking ability and understand energy from scientific viewpoint.

LEGO CAMP -WEEK 7

Gear up your engineering skills with Play-Well TEKnologies and tens of thousands of LEGO® parts! Apply real-world concepts in physics, engineering, and architecture through engineer-designed projects such as: Houseboats, Mini Golf Courses, Forklifts, and the London Tower Bridge. Design and build as never before, and explore your craziest ideas in a supportive environment. There are no prerequisites for this course.

MIXED MEDIA / DRAWING CAMP- WEEK 8

Participants will have the chance to explore their artistic potential and express themselves through paint, sculpture, natural objects, making collages, using more innovative materials and exploring a variety of fun. Art camp will provide five days of art, offered in the most creative, inventive, original, and thoughtful way possible. In each class participants will have fun creating projects that show their up and coming artistry and how to incorporate fun into art.

ZOO CAMP - WEEK 9

This camp is filled for the child who loves animals. We will take a look into what it takes to run a zoo and how the animal come to be in the zoo. Learn their habitats .Kids will have a great time with music, games and craft. Each kid will make their own zoo.
