

SCRATCH JR programming

It's fun!

Create amazing stories!

This program is designed for beginner programmers who do not have any previous programming experience and the first stepping stone to next Scratch programming. Your child will learn the fundamentals of programming such as step-by-step movement, loops, and event-driven programming.

After learning the fundamentals of programming by solving challenges, your child will develop creative interactive stories by designing characters, recording sounds, and programming the movements.

The rental cost of the tablet is included in the class fee.

From March 1st
to April 26th
From 3 pm to 4 pm
No class on 3/29, 4/19
\$105 for 7 classes
Tablet cost is included
